HARD SKILLS

- JavaScript
- TypeScript
- PHP
- React.js
- React Query
- Next.js
- Laravel
- Inertia.js
- Docker
- MySQL
- WordPress
- Bedrock
- Acorn
- Sage
- HTML / CSS
- SASS
- Tailwind
- Redux Toolkit
- Axios
- REST API
- Moonshine
- Spatie
- Lodash
- Swiper
- Toastify

PROFILE

Full-Stack Developer with hands-on experience in developing full-stack web applications, including e-commerce solutions with product management, order flow, authentication, and multilingual support using Next.js, Laravel and WordPress.

Skilled in building both frontend and backend parts of projects — from adaptive UI and API integrations to backend architecture and admin panels.

Open to learning and adopting new technologies or other modern frameworks.

Seeking production-level projects with real technical challenges — optimization, complex integrations, and scalable architecture.

WORK EXPERIENCE

Private Company (Contract)

February 2026 - April 2026

Full-Stack Developer / WordPress (Roots Stack)

Developed 15+ landing pages and WordPress-based project using a modern stack: Bedrock + Sage + Acorn with a full development cycle: from layout implementation to deployment and CMS customization.

Landing pages:

Tech Stack:

- PHP, JavaScript, HTML, CSS

Responsibilities:

- Built landing pages using PHP, JavaScript, HTML, and CSS
- Configured SEO fundamentals (meta tags, sitemap.xml, robots.txt) to improve indexing
- Deployed landings to hosting environments and configured domains
- Set up and configured Nginx (SSL certificates, redirects, domain routing)

WordPress (Roots Stack) project:

Tech Stack:

- PHP, WordPress, Bedrock, Sage, Acorn, Alpine.js, Ajax, JavaScript, HTML5, CSS3, Tailwind, Swiper, ACF

Responsibilities:

- Developed a full project using Bedrock, Sage, and Acorn
- Applied clean architecture principles: DTO (Data Transfer Objects), Service layer, Repository pattern
- Used Blade templating engine and reusable Blade components
- Integrated Advanced Custom Fields (ACF) without relying on Gutenberg/block editor
- Customized WordPress admin panel for project-specific needs
- Optimized WordPress by removing unnecessary styles, scripts, and default features

- Tawk API
- Material UI
- Git
- BEM
- ESLint
- Husky
- Prettier
- Postman
- Slack
- Figma

SOFT SKILLS

- Teamwork
- Time Management
- Effective Communication
- Critical Thinking
- Problem solving
- Fast learning

Doroshenko Agency

November 2024 - December 2025

Full-Stack Developer

American project MoveUp - Internet platform for US Trucking company:

Tech Stack:

- TypeScript, React.js, React Context, React Query, Redux, Lodash
- Tailwind CSS, SASS, Material UI, Swiper.js, Axios, Git, ESLint
- PHP, Laravel, Inertia.js, Moonshine, Tiny Mce, Docker, MySQL

Responsibilities:

- Optimized database queries, reducing the number of SQL requests , which significantly improved system performance and loading speed
- Developed a custom admin panel using Moonshine, for the platform portal
- Adapted the front end of the portal for filling from the admin panel
- Maintained and improved a logistics portal for US Trucking company and its subsidiaries
- Added new features and reworked legacy functionality to meet updated business requirements
- Redesigned key UI components to improve usability and visual consistency
- Developed React components and integrated them via Inertia.js
- Actively cooperated with the team to deliver stable production updates

Project DentPro - Internet store for dental company:

Tech Stack:

- TypeScript, React.js, Next.js, SSR (Server Side Rendering), Redux, Swiper.js, Tailwind CSS, REST API, Tawk API, Axios, Git, ESLint, Prettier, Husky
- PHP, Laravel / Socialite / Sanctum, Moonshine, Tiny Mce, Spatie, Docker, MySQL

Responsibilities:

- Built a website from scratch using Next.js + Laravel
- Configured Dynamic routing
- Used SSR (Server Side Rendering) in Next.js to load pages quickly
- Implemented SEO optimization (metatags, dynamic headers, Open Graph)
- Created and configured the admin panel using the Moonshine library
- Configured the admin panel in Moonshine for managing products, languages, and content blocks
- Implemented multilingualism (uk/ru/en) through API translations from the admin panel
- Configured the data structure
- Implemented authentication via Laravel Sanctum and social login (Google, Facebook)
- Integrated Tawk.to chat for real-time client communication
- Created a fully responsive UI with Tailwind CSS, ensuring pixel-perfect adaptation

Project Glass Manufacturing Company Store:

Tech Stack:

- JavaScript, React.js, Next.js, Axios
- Laravel, Moonshine, Spatie

Responsibilities:

- Reworked and improved admin panel on Moonshine
- Refactored Laravel models and relationships, improving data consistency
- Improved UX/UI
- Adjusted product cards and fixed issue with product filters

Top Izdato - Internship

August 2024 - November 2024

Front-End Intern / Junior Developer

- Created an admin panel for lead management with CRM integration using React, Redux Toolkit, and REST API.
- Improved project structure and routing,
- Styled the UI with support for dynamic color themes (CSS, SCSS).
- Gained experience working in a collaborative environment and version control with Git.

EDUCATION

NTU «DNIPRO POLYTECHNIC»

- Bachelor of Engineering Mechanics 2006 - 2010
- Specialist of Mining Equipment 2010 - 2012

Courses in School ++

- Computer Science February 2024 - April 2024
- Front-end Development / React April 2024 - August 2024
